

Journal of Advances in Information Technology

CONTENTS

Volume 15, Number 11, 2024

- Apply a CNN-Based Ensemble Model to Chest-X Ray Image-Based Pneumonia Classification 1205
Ngoc Ha Pham and Giang Son Tran*
- Exploration on News Recommendation Model under Machine Learning and Knowledge Graph Technology 1215
Fangni Li
- Spectrum Management, Power Optimization and Interference Cancellation in Ultra-Dense Heterogeneous Femtocell Networks..... 1221
Shilpa Bhairanatti and Rubini P*
- Mitigating Auto-scaling Delays in Elastic-Docker for Better Responsiveness of Burst and Dynamic Workloads 1229
Tarek Helmy
- Harnessing Social Media Sentiment Analysis for Wildlife Conservation..... 1236
Abdur Rashid Sangi, Ma Zhen, Zhang Chi, Ye Nan, and Baha Ihnaini**
- Deep Alternate Kernel Fused Self-Attention Model-Based Lung Nodule Classification 1242
*Rani Saritha R. * and V. Sangeetha*
- Comparative Analysis of Pre-trained Deep Learning Models for Facial Landmark Localization on Enhanced Dataset of Heavily Occluded Face Images 1252
Zieb Rabie Alqahtani, Mohd Shahrizal Sunar, and Abdelmonim M. Artoli*
- Advanced Hybrid and Preprocessing Models for Diagnosis Challenges in Data Classification..... 1264
Mustafa Adil Fayez and Sefer Kurnaz*
- Comparison of Models for Predicting the Number of Calls Received in a Call Center through Time Series Analysis 1273
Abraham Gutiérrez, Jesús Bobadilla, and Santiago Alonso*
- Fog-Based Smart Infection Detection System (SIDS) Architecture Using Energy-Efficient Geese Optimization Load Balancing Approach (GOLBA)..... 1283
Gaurav Goel and Amit Kr Chaturvedi*
- EdgeCutMix Augmentation: Enhancing the Leaf Disease Classification for the Minority Class 1295
Derisma, Nur Rokhman, and Dyah Aruming Tyas*
